

Tan Yu Shan

Lasalle College for the Arts (UAS) graduate

About

I am a Bachelor of Music graduate with a strong foundation in both theoretical and practical aspects of music and live sound. My studies have equipped me with skills in performance, composition, and critical analysis, allowing me to approach music with both creativity and discipline.

Eager to showcase my music producing skills and sound design skills, understanding of music theory, and recording fundamentals that would provide a positive contribution to the different projects I do. I am also a team player and an empathic collaborator with my peers, colleagues and clients alike.
