

GRACIELLA LIM

Graduate of LASALLE College of the Arts Singapore with a Bachelor's degree in Interior Design. My academic studies have enabled me to construct a solid base which supports my abilities in spatial design and concept development and user-centered environments. My design software skills include Photoshop and AutoCAD and SketchUp and I developed the abilities in 3D modeling and conceptual visualization.

My work is driven by a sensitivity to human experience, particularly in transitional and everyday spaces. I believe design should create balance between functional needs and emotional responses and narrative elements. I demonstrate reliability through my ability to adapt to different situations while taking proactive actions. As an individual, I am reliable, adaptable, and proactive, with a willingness to continuously learn and refine my skills.
