Adaptable

## LANGUAGES

Burmese ( Verbal and written ) 

English ( Verbal and written ) 

## PROFILE

I am an adaptable and outgoing Interior Design graduate from LASALLE College of the Arts, where I completed both my Diploma and Bachelor's degree. Despite challenges along the way, I continuously push myself to approach situations from fresh perspectives. I enjoy exploring and experimenting with new ideas, always striving to grow both creatively and personally.

I see design as a spatial discipline grounded in observation, culture, and the human form. I am particularly interested in how architecture can move beyond visual appearance to engage with daily rituals, movement, and sensory experience.

## WORK EXPERIENCES

**Interior Designer Intern**  
LIVSPACE | Jun 2022 - Oct 2022

Learnt to formulate space planning, concept development, and interior design conceptualisation. As well as using software such as 3Ds Max, Photoshop, SketchUp etc. Prepare presentations regarding the design intent, colour scheme and material board to present to clients and contractors. I was also able to construct specifications, design documentation, and material selection.

**Interior Designer Intern**  
CT Smart Homes | Jun 2025 - Aug 2025

**Interior Designer Assistant**  
CT Smart Homes | Aug 2025 - Sep 2025

During my internship at a residential-focused design firm, I was involved in a range of tasks spanning both design and site work. I assisted in drafting drawings for residential houses, produced carpentry drawings, and developed 3D models using SketchUp. I also contributed to an office layout redesign, alongside supporting data entry and research tasks.

Beyond the studio, I participated in site visits with clients, prepared site reports, and assisted with on-site styling and decoration, gaining hands-on experience in translating design concepts into built outcomes.

## TECHNICAL SKILLS

Photoshop

3Ds MAX

Sketchup
