(2022)

Proficiency

Autodesk AutoCAD
Google SketchUp
Adobe Photoshop
Enscape
Lumion 10
Vray
3d modelling

Soft skills

Creative and Innovative
Detail - sensitive
Active and empathetic listener

About

As a designer with an inherently artistic nature, I believe design is a manifestation of arts. I am constantly immersed in the exploration of how design shapes the world around us. I'm always looking for ways to grow whether through creative challenges, collaboration, or stepping outside my comfort zone. I love working with others, listening to everyone's unique stories to expand my horizon and learning a new definition of the world we live in. I strive to create memorable spaces that in turn could show how design could transform a space and, in turn, transform lives.

Experience

2024
DesignSingapore
council

Ambassador

I assisted in guiding visitors, providing event information, and supporting the coordination of exhibitions and talks. I engaged with attendees to enhance their experience, helped manage crowd flow, and represented the festival's mission to celebrate creativity and design.

This role allowed me to connect with design professionals, gain insight into event operations, and contribute to a vibrant celebration of design and innovation.

2024
Apse interiors

Intern

Designed and drafted detailed technical sets for residential and commercial projects to handover to contractors. Created 3D renders and worked on digital models to help clients visualise. Shadowed senior architects to gain on-site execution experience.
